

**note**

If a button is pressed longer than 30 seconds, the remote control stops operating to conserve battery power. When you release the button, normal operation resumes.

## Using the Remote Control

Make sure batteries are installed. Follow these tips for using the remote control:

- Point the remote control at the front of the projector or at the screen.
- Stand within 49 feet (15 meters) of the projector.

## Controlling the Picture and Sound

You can use the remote control to preview and select your picture sources, temporarily turn off the picture and sound, freeze the action, zoom in on the picture, and adjust the volume.

**note**

Using the remote under bright fluorescent lamps or in direct sunlight may affect projector response.

### **Switching Between Picture Sources**

If your projector is connected to more than one computer and/or video source, you can switch between the different sources:

- The easiest way to select your source is to press the Search button on the remote control (or the Source Search button on the projector) repeatedly until you see the image you want on the screen.

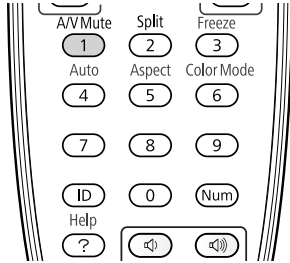

- On the remote control, you can press one of the Source buttons to select the connected device you need.

After you select a source, the screen goes dark for a moment before the image appears.

## Turning Off the Picture and Sound

You can temporarily turn off the image and sound by pressing the A/V Mute button on the remote control. This turns the image black and stops the sound. To turn the image and sound back on, press the button again.

You can have the screen turn blue or display an image such as a company logo when you press the A/V Mute button.

## Stopping Action

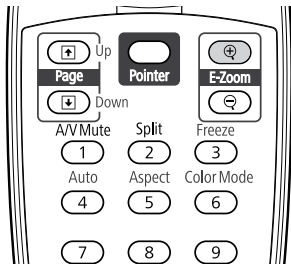

Press the Freeze button on the remote control to stop the action in your video or computer image. The image freezes but the sound continues.

To restart the action, press the Freeze button again.

### **note**

This function pauses the image, not the sound. Because the source continues to transmit signals, when you resume the action, it won't be at the point you stopped it.

## Zooming Part of Your Image

You can zoom in on a portion of the image using the E-Zoom buttons on the remote control.

1. Press the E-Zoom  button on the remote control.  
You see a crosshair indicating the center of the zoom-in area.
2. Use the  pointer button to position the crosshair.
3. Continue pressing the E-Zoom  button to enlarge the selected area up to 4 times.
4. While the image is enlarged, you can:
  - Use the  pointer button to move around the screen.
  - Press the E-Zoom  button to zoom out.
5. When done, press the Esc button to return the image to its original size.

### note

You cannot use the Progressive or Noise Reduction features while you are using E-Zoom.

## Controlling the Volume

To change the volume, press the  or  button on the remote control.

You can also adjust the volume using the projector's menu system.

### note

To temporarily shut off the sound and picture, press the A/V Mute button.
