STU to enable reference compensation.
 1088 OCP: 5m GL: 20 PR: 1 Dec: 5 nCh: 10300

Host IP: Host Port:

First Output Channel (0 - auto-align to the earliest channel for the selected xGL):

Spatial Decimation: Temporal Decimation:

STU start channel: STU end channel:

Listen Port: Output file path:

Autostart delay (s): Autostart

Host IP: Host Port:

First Output Channel (0 - auto-align to the earliest channel for the selected xGL):

Spatial Decimation: Temporal Decimation: Gauge Length multiplication: Unwrap data to 64-bit

STU start channel: STU end channel: Temperature scaling factor (rad/K/m): Enable STU compensation

Listen Port: Output file path: Output file Duration (s):

Autostart delay (s): Autostart
